

# NANOSHIBAINU

# WHITEPAPER V1.1

# INTRODUCTION

Nano Shiba Inu is a one-of-a-kind reward and rebase token that uses a proprietary contract on the Binance Smart Chain. Holders of Nano Shiba Inu are rewarded in \$SHIB token rewards that are distributed automatically through one of the contract's protocols.

At the center of it all, the goal remains to create a project that gives a voice to its holders by creating an unbreakable community foundation. Creating a community project is embracing and recognizing that strength and growth does not come from an single perspective, but by creating a cohesive unit, where the sum of all parts come together to make it whole.

Given this perspective and vision, we are excited to bring the DeFi community Nano Shiba Inu.

**[WWW.NANOSHIBAINU.IO](http://WWW.NANOSHIBAINU.IO)**

# OUR VALUES

First and foremost we are supporters and enthusiasts of cryptocurrency and decentralized finance, and the technology behind it, and it's ability to revolutionize the world.

We embrace all with open arms, our community is 100% dedicated to respect, equality, and there is no room for discrimination.

We are a team that understands the value in community and collaboration. We come together to share our ideas and content with our community and the world of DeFi, and also are a team that wants to help others, and keep the global adoption of DeFi as the overlaying goal for us all.

And finally, we care about taking initiative and speaking with our actions. We see the potential this project has and we will do everything we can to make our vision a reality.

# WHY BSC

There are several reasons why we decided to make the home of Nano Shiba Inu on the Binance Smart Chain.

One of the key aspects of choosing the Binance Smart Chain is that the low transaction fees and high speed of transactions, makes it more accessible for mass adoption. Furthermore, with an algorithm that uses 21 validators that makes it possible to create a new block every 3 seconds. This provides an incredible infrastructure that can maintain the high-speeds.

Finally, with the ecosystem still growing, as more projects move from the Ethereum platform to BSC, this still provides an incredible opportunity for us to develop our market share within the landscape.

# WHAT IS REBASE

## What is a rebase?

The rebasing mechanism reduces the current supply. In turn the value of each token increases. The rebase protocol will make these adjustments to the circulating supply periodically. This is known as a negative rebase. Through an elastic supply, rebases can be used to counter a chart's visual price volatility.

## What's going on with the number of my tokens?

Due to the elastic supply, the number of circulating tokens is changing periodically. The number of tokens you own may change, however the percentage of your share within the token will remain the same, as market cap increases, so will the value of your investment. Your tokens will never reach 0 due to the way the rebase is been created.

## How do I track how much my investment has grown?

At the moment you purchase the tokens, be sure to remember the market cap. As the market cap increases, so will the value of your investment.

Your token number will decrease as the rebasing process takes place, but the percentage of your market share will remain the same. All of this takes place without holders having to do anything.

# TOKENOMICS

## **Buy Tax Total 12% - Breakdown:**

### **4% \$SHIB Rewards**

Part of the innovative nature of this project is that along with rebase, there is also a rewards protocol built into the contract that distributes four percent of every transaction to holders in \$SHIB token, this happens automatically and is a reward for just holding.

### **4% Marketing Wallet**

Four percent of every transaction will be taxed and allocated to the marketing wallet. This will make it possible for the team to continue to provide marketing and growth of the token through partnerships and collaborations through different avenues.

### **2% Auto LP**

Two percent of every transaction will be allocated to the Liquidity pool to reduce volatility and increase stability as the market cap changes and we grow.

### **2% Dev Wallet**

Two percent goes to the dev wallet to pay back some of the hard work and money that the team has already invested in the project.

## **Sell Tax Total 15% - Breakdown:**

The Sell tax is 15% total, with 3% to LP, 2% to Dev wallet and 5% each to Marketing and \$SHIB rewards.

# ROADMAP

## Phase 1

Whitelist Competition · Community Growth · Community Giveaways · Website Launch · Presale · Aggressive marketing before launch · Coin Launch

## Phase 2

Release Whitepaper · Apply for CoinGecko · Apply for CoinMarketCap · Continuous marketing and ads on different platforms · Grow the Community and create multilingual sub-communities · Continuous competitions and giveaways · Submit requests for third-party audits

## Phase 3

CoinGecko Listing · Continuous Marketing Push · CoinMarketCap listing · Release Third-party Audit · Community growth with giveaways and rewards for our diamond handed members!

## Phase 4

Start with the development of a Reward Dashboard where holders can receive more information about their \$SHIB rewards · Donation to a trusted animal charity · Release articles for more awareness about Nano Shiba Inu · Big marketing push, including Billboards in NYC

## Phase 5

Reward Dashboard · Redesign Website · Big celebrity marketing · Get listed on bigger exchanges · Development of Nano Shiba Inu Swap · Huge community Giveaway

After the completion of these phases, the team will expand the goals and roadmap to best accommodate the future of Nano Shiba Inu. Our goal is to make the cutest Nano Shiba Inu one of the leading dogs and bring legitimacy to the crypto universe!

# TEAM

## RKS

RKS is the Developer and part of the marketing team for Nano Shiba Inu. She has worked on previous projects and has experience with not only being a developer, but also a marketer. In her professional life, she has marketed for big companies and brands. Furthermore, she has connections in this space to ensure that everything looks perfect before and after launch.

## JJ

JJ handles the marketing together with RKS. He has been in this space for a while. He understands what it takes to run a successful project. He will use his connections to get this project as many views as possible. From his work & dedication on previous projects, Nano Shiba Inu will undoubtedly reach the Moon!

## Amir

Amir is responsible for the website development and designs for Nano Shiba Inu. He will ensure that the website and all other social media pages are up-to-date so that our (potential) investors are constantly updated about the newest facts about this project.

## Albino Rhino

Albino Rhino is the community manager for Nano Shiba Inu. Albino is well connected in this space and is excited to help make Nano Shiba Inu one of the best projects in BSC. He is the community manager and will lead the community to become the best one in this space.
